Spécifique

M

Mesurable

A

Atteignable

R

Réaliste

T

Temporel

Créer un MVP autobattler basé sur des personnages en 3D, où les joueurs construisent des decks d'actions conditionnées.

Prototype 100% fonctionnel avec les fonctionnalités principales

Garantir un temps de réponse serveur de 300ms

Miser sur les compétences acquises lors de la formation

Hébergement sur des plateformes économiques

En fonction de l'avancement par rapport au planning prévisionnel, recadrer le projet pour ne garder que l'essentiel sans omettre de laisser place à de fonctionnalités futures

Lancement du MVP prévu en août 2025

Mises à jour et maintenance continues après le lancement selon le retour des utilisateurs

ENVIRONNEMENT

The screenshot shows the Visual Studio Code interface with the following details:

- Explorer View:** Shows the project structure under ".vscode". The "terminals.json" file is selected.
- Code Editor:** Displays the content of the "terminals.json" file, which defines three terminal configurations: "CLI", "Frontend", and "Backend".
- Terminal Tab:** Shows the terminal output for the "CLI" configuration, indicating the user is at the root directory of the "backend_prisma" project.
- Bottom Status Bar:** Shows the current file path: "Kevin@DESKTOP-BOB7QEA MINGW64 ~/Documents/Programmation/Projets/Ploybout/backend_prisma".

ANALYSE DE PERFORMANCE

The screenshot displays a dark-themed web application interface. On the left, a sidebar features the logo "PLAYBOUT" with a stylized orange and brown icon. Below the logo are navigation links: Profile, Collection, Equipment, and Arena. A "Logout →" button is located at the top right of the sidebar. The main content area on the left shows a welcome message "Welcome azeazeaze" and a 3D character model. Below the character are sections for "Fights history" (No recent fights found) and "Deck". The deck section shows five slots, the first of which contains a button labeled "Forward!". The main content area on the right is titled "Performance" and includes four audit scores: 0/4 for Performance, 18/18 for Accessibility, 5/5 for Best Practices, and 4/4 for SEO. The "Performance" audit section contains a note about future insights replacing performance audits, a "Go back to audits" button, and a list of four passed audits. The "Accessibility" audit section shows a score of 18/18.

Performance Accessibility Best Practices SEO

Later this year, insights will replace performance audits. [Learn more and provide feedback here](#). [Go back to audits](#)

PASSED AUDITS (4)

- Avoids an excessive DOM size — 64 elements
- Image elements have explicit `width` and `height`
- Has a `<meta name="viewport">` tag with `width` or `initial-scale`
- Images were appropriate for their displayed size

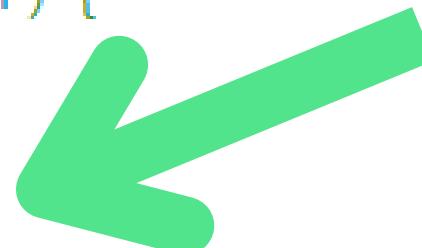

18/18

Accessibility

TESTS ET SÉCURITÉ

Connexion d'un utilisateur

Objectif :

- + Vérifier que la fonctionnalité de connexion fonctionne correctement.

Préconditions :

- L'application est connectée à la base de données.
- Un utilisateur valide est déjà enregistré.

Étapes :

1. Accéder à l'interface de connexion.
2. Saisir un nom d'utilisateur et un mot de passe valides.
3. Soumettre le formulaire de connexion.

Résultats attendus :

- L'utilisateur est authentifié avec succès.
- L'utilisateur est redirigé vers son tableau de bord.

Statut :

✗ Non validé

Rapport de bugs :

Bugs

Connexion d'un utilisateur

Objectif :

Vérifier que la fonctionnalité de connexion fonctionne correctement.

Préconditions :

- L'application est connectée à la base de données.
- Un utilisateur valide est déjà enregistré.

Étapes :

1. Accéder à l'interface de connexion.
2. Saisir un nom d'utilisateur et un mot de passe valides.
3. Soumettre le formulaire de connexion.

Résultats attendus :

- L'utilisateur est authentifié avec succès.
- L'utilisateur est redirigé vers son tableau de bord.

Statut :

 Validé

Rapport de bugs :

 Bugs

CONCLUSION

PERSPECTIVE

- Finaliser le visuel
- Optimiser l'expérience utilisateur
- Mettre en place le système de progression
- Améliorer la sécurité
- Interface administrateur

Merci
